Finesse

Look, admire & be surprised

Finesse lives up to its name! Look, admire & be surprised. Finesse announces sleeping comfort generation 5.0. Finesse stands for exceptionally refined design & smart technology. You control Finesse. You control the comfort, the look & feel. Finesse? A delight for the eye, a blessing for body & spirit. This is not a boxspring bed, this is a dream ... A State of the Art design & well-feeling!

Design & Comfort

Spacious and clean lines

With its design feet, the Finesse seems to float above the ground. Even at the head end the floor is free. The bedside tables too.

With all luxurious designs, all mechanics hang invisibly under the bed. This floating design has a visual effect: you have a clear view of the space under the bed.

You see the floor, the light shines freely; it gives a transparent image, a spacious feel. The floating design also has a hygienic aspect: you can thoroughly clean your bedroom – away from bedside tables, engines, cords and cables. Under your bed no accumulation of dust! It gives a really uncluttered feel.

Solid as a rock!

Finesse owes its sophisticated looks to its high-tech construction. Everything is fixed to metal. You might look under the bed. ... The motors anchored within the frame. No hinges, but robust profiles. Two single beds are linked together to form a double bed by use of multiple connectors.

In short: Finesse is a powerful example of stability & durability. The ultimate proof? Put on your socks and shoes and stand on the edge of the lifted foot end; Finesse remains motionless on its slender legs.

Top class!

Finesse is design excellence it uses a high end metal finish as used with aluminium finishings or window frames. A powder coating with a magnificent texture: look and feel!

You recognize this exclusive finish right by the very subtle glint in the varnish. A refined touch of top-class!

Accessories

Dresscode

You can tailor make Finesse and follow the rhythm of your heart. The headboard, the side tables and the boxspring are beautifully upholstered. Upholstering feet and frame is a matter of click & select or design. The metal you can cover with a 3D, upholstered decorative accessory: upholster the legs and the trim in between the legs with stylish options. Just click them in! The integrated magnets assure a

perfect fit. They seamlessly fit into the metal profiles.

The Deco accessories are optional per set: when and as often as you want. The fabric makes the difference: between a purist or cosy stylized Finesse. The choice is yours. With or without deco fabric?

Today like this, tomorrow otherways? In a minute you can restyle your Finesse bed.

Personal

Finish your Finesse with floating night tables attached to the frame. The wooden top is lined by a raised safety edge. At a touch you can easily put in your belongings. And if you accidentally knock over your nightcap ... not yet a disaster!

Finesse bedside tables are available in 2 versions:

- a gliding version; this side table runs on a rail underneath the frame. You can glide it forwards or backwards smoothly. Whether you're sitting or lying, you'll always have everything at your fingertips. The table can each time meet your position.
- a fixed version including an upholstered drawer. This bedside table is attached to the frame. The tray slides in the direction of foot. Always reachable from within your bed: your valuables are right at hand. Safe and gentle, the side table is even upholstered on the inside!

Light, day and night

Flashlight

Finesse offers you light in the darkness. The remote control comes standard with a flashlight. Always useful if you still need something. Trying to find something in the dark or the light switch? You just turn on your flashlight without murmurings and rumblings.

Floorlight

Finesse is equipped with Led-floor lighting. Hidden within the frame, under the bed. Ideal if you need to get up at night! Just lit the floor next to your bed. You don't actually need more light. Your partner sleeps undisturbed, even when you crawl back into bed moments later.

The floor light can be dimmed and switched on or out by the push of a button.

Finesse

Ergonomic sleeping comfort

Pocketspring

Finesse combines design and comfort. The ultra fine boxspring is filled with mini-pocket springs: 5cm high, 500 pieces per m². (To give you an idea: on average a mattress offers around 300 springs per m²) The Finesse pocket springs are tuned to match the body zones. Your body is super ergonomically supported!

The mini pocket springs spread over almost the entire length and width of the Finesse within a small foam framework. You are not affected by firm edges!

On the Finesse you can relax, sleep and dream and enjoy an ergonomic balanced sleeping comfort.

VIV[®]-label

Finesse is VIV-labelled: Vertical Integrated Ventilation. Ventilation is the condition for a healthy sleep climate. Everyone perspires at night: people perspire about 500 ml per night. It is easy to understand why ventilation is essential: airflow evaporates moisture. The reason why Finesse is at the top, it is finished with a breathable 3D fabric.

The wooden bottom plate inside the base has ventilation holes in strategic places. The holes are neatly finished with a matching coverplate. This way air can flow freely from top to bottom assuring a 100% vertical ventilation. Finesse offers you a guaranteed vertical fresh sleeping climate.

Anti Skid finish

Each detail has a meaning. Those wavy lines on the 3D fabric? Indeed, you spontaneously link it with rippling water and a walk on the beach. The wavy lines visualize the refreshing effect. But actually they have a very practical reason: the wavy line is made in latex. They keep the mattress always in place, even when adjusting your electrical Finesse!

Functions & Features

Soft like a whisper

Finesse is available in a flat or in various adjustable versions: adjustable head and foot end, different number of motors even including vibrating massage. No lack of options.

Whatever you choose, the mechanism is always hidden. The motors and transformers are fitted tightly within the metal frame, the cables are attached through a cable management system.

Finesse uses linear motors: insiders know what this means! More efficient does not exist. The engine pushes only the desired amount upwards or downwards. Linear motors save forces and energy.

And listen ... Indeed. You hear nothing! Bearings, plastic, make sure that the sound is muted. Finesse puts your bed to its position in whispermode.

Programming

Finesse uses the very stable radio frequency channels to interact with the remote control, the best way to secure a perfect control over your bed. Your favorite positions & features can be programmed within the remote using the different keys. At the touch of a button on your screen the Finesse automatically acts as requested.

AS-preset

AS stands for **anti-snore**: anti-snoring. Immediately you are thinking about the annoying sound of snoring. In fact, snoring is a symptom. The causes are various: smoking, drinking, age, sleeping on your back. You snore as your windpipe is partially blocked. You long (snore) for a small air. The medically proven solution: sleeping with your head slightly up, at an angle of 7-8°. Your larynx gets all the space, the airpipes are opened at maximum and you can breath freely.

AS also stands for anti-push. Your heart has to pump blood continuously, even against gravity: as well as you stand, sit or even lay down. The medical solution: sleeping with your legs slightly up, at an angle of 7-8°. Your feet are no longer at the lowest level. Your blood can circulate freely, from head to toe. Your heart doesn't have to pump so heavily, because it is in balance: in line with the rest of your body. This 7-8° position for your head & feet is standard programmed under the preset button AS.

Finesse in AS position allows a good oxygen supply during the entire night and improves blood circulation: this is crucial for your heart & body!

Z-preset

Z stands for **Zero Gravity**. Think of astronauts in space or the Fowler-position of bedridden patients in hospitals, or the fetal position of a baby in the womb. They all have one thing in common: the body posture; raised knees plus the back angled or curved.

Zero Gravity is committed to such a feeling of weightlessness in bed. We all suffer from gravity pressure all day. Your body really needs to recover quickly.

The medically sound solution: your upper body and knees tilted up at an angle of 28°, this way your pelvis will be at the lowest point of the bed. The effects you feel straight away! Your (abdominal) muscles relax at maximum. You have less pressure on your chest, you can breathe easier. Your legs are less heavy. Blood circulation and oxygen supply come quickly back up to standard. These effects you will notice them even harder when putting the Finesse bed back in its horizontal position.

This 28° stand for your upper body & knees is preset under the Z button.

The Finesse in Z-position quickly puts your body in balance: within a few minutes you feel like reborn. Absolutely delicious!

Sleep-ritual

Would you like to enjoy the 'Finesse' of your night's sleep? Then don't go to bed and try to sleep right away. You deserve better! Finish the day and start the night with the Finesse sleep-ritual.

The only thing left to do: 2 steps.

Step 1: activate the Z-position once you lay down in bed. You feel the stress from your body floating away. Go out of this position after about 10 minutes.

Step 2: activate the AS-position before you really go to sleep. You are not aware what happens at night: you will notice only when you wake up. Put your bed back to its horizontal position when getting out of the bed, not before.

So small the bother, so intense the effect. What a great beginning of a new day! Day in, day out ... Thank you so much, Finesse!

Functions & Features

S-feature

Finesse is available in flat or electrical adjustable versions. You do not see the difference. Two single beds together form a uniform complete whole. Let us dream away and choose your favorite model. Adjusting 2 identical electrical beds can be done in perfect sync mode. Together the back and/or legs up?

The S-function will move both beds simultaneously with millimeter accuracy, on the second exactly.

It feels like GPS technology! Finesse offers you an experience of the ultimate I + you = we-feeling.

S-function OFF

S-function ON

Massage-feature

Finesse lets you enjoy a massage on-demand. Would you like to massage just your legs or your back? Or both, in a smooth motion? Choose 'the soft hand' or the 'firm grip' mode. Long or rather short and sweet? Would you like your daily massage, or something less frequently? You can arrange it all by yourself, with one finger. You don't have to leave your bed and house; the ultimate wellness@home.

Finesse including massage allows your body & mind to relax: bye bye stress.

Dimensions

Bed and headboard

Finesse beds are available in sizes 200 - 210 - 220 cm length.

The maximum width for the one piece version is 140 cm; in a two-part version you have a choice to 200 cm width.

The headboards -by their design- are always oversized; a list of the actual widths:

width	one piece				two-pieces			
	90	100	120	140	150	160	180	200
